

PC Live software

Turn any Vaetrix gauge into a live datalogger using most Windows PC's. Just download the software from the website and connect the USB to any Vaetrix product. Registration is required to use the product.

Use your PC and eliminate the chart and pens from your chart recorder

Key Features

- Live streaming with multi-color graph, digital pressure, and temperature data
- Report builder with job info, notes, attachments, test windows, and ability to zoom
- Create and send professional .pdf reports in a matter of minutes with NIST traceable encrypted results without additional software
- Monitor data from multiple devices at one time!
